ARBORETUM

# Water is life-giving:

Plants, animals, and people need clean water to live.

Water has special properties. It changes forms.

People around the world create ways to interact with water in their lives.

What would you like to know about water?

I wonder:

---

---

---

---

---

---

---

---

# Water Changes

Describe and show how water changed.

 I observed:

---

---

---

---

 I wonder:

---

---

# World of Water

*Draw a favorite work of art that you saw on your tour of the museum.*

How do people use water?

---

---

How do they move it around?

---

---

I noticed:

# Water and Plants

What did you discover about plants and water?

 I noticed:

---

---

---

---

# Water Story

Write your own story about a drop of water.

Here are some ideas to include in your story:

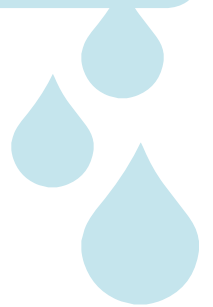

Write about something alive using water.

Write about people using water.

Add your own ideas.
