

Stages of Social & Emotional Development

Why is knowing important?

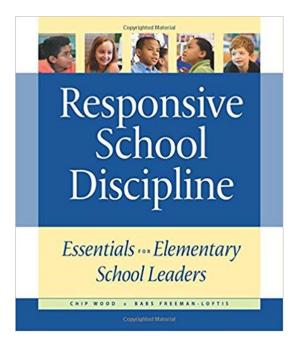

- You can model and teach the skills that will help them to successfully complete the "jobs" of their age
- You can be more patient
- You will be less likely to blame yourself or the children when they behave in frustrating, yet developmentally appropriate ways
- You can affirm children for practicing/mastering their developmental tasks

Five-year olds (kindergarten)

Social

Need consistent rules and enforcements; respond well to clear and simple expectations

Need empathetic discipline as they test and make mistakes

Physical

Need lots of physical activity, but tire quickly

Able to see close objects best: not yet able to sweep focus smoothly from left to right

Cognitive

See only one way to do things, rarely see other viewpoints

Imaginative toys and other objects are alive

Think out loud

Six-year olds -1st grade

Social	<u>Physical</u>	<u>Cognitive</u>
Competitive, not always good sports	Eyes maturing, so reading is easier	Beginning to understand past and present
Easily upset when criticized or	Often chew pencils, hair or fingernails	More able to see other viewpoints
discouraged Love encouragements,	Like lots of activity, but tire easily	Learn well through games, poems, songs
surprises and treats	,	Learn well from field trips

Seven-year olds - 2nd grade

Social	Physical	Cognitive
May be moody, shy, sulky and feel "nobody likes me"	Often keep their eyes focused on a small, close area	Better at understanding ideas such as time, space and quantity
Rely on adults for help and reassurance	Can do quiet work for longer periods	Enjoy learning about how things work
Needs security of rules, routines and physical boundaries		Enjoy repeating tasks and reviewing learning

Eight-year olds - 3rd grade

Social	<u>Physical</u>	<u>Cognitive</u>
Love group activities	Eyes able to focus well on objects near and far	Industrious, impatient and full of ideas
Like to talk and explain	on objects near and far	and full of lucas
ideas	May have growth spurt	Listen well but may not
Good sense of humor	Limited attention span	always remember
Adjust well to change, bounce back quickly		Interested in rules, logic, and fairness

Nine-year olds - 4th grade

Social	<u>Physical</u>	Cognitive
Very competitive, yet may form cliques	Coordination is better, like to rough-house	Less imaginative than at eight years old/want factual explanations
Need adults to be patient and explain clearly	Restless; can't sit for long	Begin to see the bigger world, issues of justice and fairness
Need lighthearted humor, and encouragement		Have trouble understanding abstractions (large numbers, vast areas, long time periods)

Ten-year olds - 5th grade

So	cia	
		-

Work very well in groups/able to enjoy cooperative activities

More mature sense of right and wrong/able to resolve questions of fairness

Listen well

Physical

Large muscles are developing rapidly

Snacks and rest periods benefit rapidly growing bodies

Cognitive

Good at memorizing facts, classifying

Increasingly able to think abstractly, logic and solving problems

Can concentrate for long periods of time

Eleven-year olds - 6th grade

Moody, self-absorbed and sensitive Like to challenge rules and test limits Impulsive Needs lots of food, physical activity and sleep Many girls are experiencing early humor and sensitivity Restless and very abscrong more adept at abstract thinking Can establish and modify rules and develop hypotheses Increasingly able to see the world from various perspectives	Social	<u>Physical</u>	<u>Cognitive</u>
and test limits physical activity and rules and develop sleep hypotheses Many girls are Need adult empathy, humor and sensitivity physical activity and rules and develop hypotheses Increasingly able to see experiencing early the world from various	•	•	9
Need adult empathy, humor and sensitivity Many girls are Increasingly able to see experiencing early the world from various	and test limits	physical activity and	rules and develop
	Need adult empathy,	experiencing early	the world from various

12-year olds - 6th/7th grade

Social	<u>Physical</u>	Cognitive
Capable of self- awareness, empathy	Very energetic, need lots of sleep, exercise and food	Can and will see both sides of an argument
Enthusiastic and uninhibited, appear to	Growth spurts	Increasingly able to organize their thoughts
feel secure Care more about peer opinions	Girls show signs of puberty	Interested in history, civics, environmental issues, and pop culture
